Large Format Labeling Solution

Products which require a larger label format are difficult to maintain, especially when multiple items are introduced to the product line. Companies spend thousands developing individual labels for each new product variation.

CMSI Technologies has developed a print on-demand system which offers the ability to modify label requirements while reducing label inventory and increasing flexibility during packaging. Maximize your efficiencies by using a thermal transfer printer with ribbon saver and maintain your image by utilizing a pre-printed label stock.

This solution may be applied to multiple products:

Industrial Chemical Labeling

- Paints
- Varnishes
- Coatings
- Sealants
- Finishes
- Mixes

Agricultural Product Labeling

- Seed & Feed
- Salt Blocks
- Glucosamine
- Nutrients

Labeling a variety of industrial containers:

- 55 Gallon Drums
- F-Style Gallons
- 5 Gallon Pails
- Quarts
- Round Gallons
- Pints

Pre-printed Logo Here

Don't leave it blank! Maintain your image. Ask about our pre-printed label stock.

Print the variables using the TM 1008

Tagmaster 1008 Printer

- + 305 DPI print resolution.
- + Print at speeds of 3", 5" or 8" per second.
- + Direct Thermal Printing/Thermal Transfer.
- + Serial, Parallel, Ethernet, and I/O Interfaces.
- + Print up to 8.38" wide x 54" long labels

PRODUCT CONTROL

Take control of your products by eliminating the need for multiple labels. Create the variables as needed while determining your own quantities.

INVENTORY CONTROL

Reduce inventory by utilizing a pre-printed label template that can be applied to a variety of different products.

OVERALL CONTROL

Change products with ease and reduce waste when these changes are required.
