On-Demand Solution for Industrial Use

The ALX 92 series applies labels to virtually any product with timed-to-the second precision, while processing variable data from label to label. When equipped with a Swing-on (LA-SO), shown below, the ALX 92 can apply labels to both front, back or the side of your product, depending on how the applicator is mounted. The swing-on allows a unique method for difficult applications.

– ALX 924 (4in. or 106mm)
– ALX 925 (5in. or 127mm)
– ALX 926 (6in. or 160mm)

Swing-on pneumatic applicator LA-SO for a variety of applications

The LA-SO takes labels from the dispensing edge of the ALX 92x and moves them in a swinging movement to the product, where it presses the labels on (front side) or rolls/wipes it on (side or top).
LA-SO is the abbreviation for Label Applicator Swing-On.

This LA-SO is capable of applying front labels at line speeds of up to 49.21 ft. / min. (15 m/min), and apply to the sides or tops of products moving at line speeds of up to 95 ft. / min. (30 m/min).

*Optional dust cover for harsh environments available.
Cover can be equipped with positive air flow when required.
