

Generate your own feed tags with . . .

FeedMillTag Program

Your Online Resource for Feed Tags

Stand-Alone Software for Creating Feed Tags For Multiple Species

- For medicated tags, an extensive library of FDA-approved drug clearances is available for multiple species complete with appropriate warning and caution statements including VFD language (if applicable)
- Utilizes AAFCO (Association of American Feed Control Officials) guidelines for feed tag generation, which state feed regulatory departments follow when inspecting feed tags.

Interfaces with Multiple Formulation Programs

- Import mix information from various ration formulation programs to conveniently update the Guaranteed Analysis and Ingredient Statement sections of a feed tag for those mixes that change frequently (eg. custom dairy supplements, beef premixes, swine base mixes, etc.)

FeedMillTag Program Customizable Features

- Build custom ingredient lists for commonly used items in mixes (mineral premixes, vitamin-trace mineral mixes, custom additive packs, etc.) to more easily create the ingredient listing for your tag.
- Generate custom Use Directions, Warnings, Cautions, Manufactured By designations, and default Net Quantity statements.
- Multiple Print Formats

- Create two-sided feed tags
- Print multiple tags per page in portrait or landscape orientation
- Customizable fonts and margins
- Print in pdf or rtf format

Compatible with CMSI Technologies Integrated Software & Printing Systems

- The Feed Mill Tag program contains pre-set formatting options to accommodate Tagmaster printing systems.
- The cmsi PDF Plus Software will access the Feed Mill Tag-generated pdf feed tag to add the necessary variables before printing to the Tagmaster Tagger.
