

## Tagmaster<sup>®</sup> TM-3506n Automatic Tagger

The TM-3506n Automatic Tagger will print and cut a variable length tag which is automatically inserted into your sewing machine at speeds up to 30 tags per minute. Much like our other rotary fed style taggers, the TM-3506n has the ability to insert the tag on its side, giving you the largest stitch area for increased tag strength.

The TM-3506n comes with a fully enclosed dust prevention cover that is a horizontal design to allow users to fit the machine in small places.

Large roll unwind, quick tag change over, and compact size, it gets the job done. Included with the TM-3506n is an industrial dust resistant production floor computer with PDF Plus+ Software pre-installed.

CMSI Technologies continues to provide quality solutions that meet your toughest requirements.

\* TM-3506n is compatible with Trace-It, and Q.A Scan products.

## **Why YOU would choose the TM-3506n**

### **Digital formats**

By using digital formats the TM-3506n allows you to make quick modifications when changes arise, and gives your operator the power to add the variable bag counts, best if used by dates, plant codes, company graphics, lot numbering, batch codes all at their fingertips.

### **Reduced tag cost**

By producing tags at the line, on demand, without any additional labor. Printing only what you need eliminates the scrap and wasted overruns.
