

EconoLine Wrap Labeling System

This EconoLine labeling system is a compact and economically-priced system designed specifically to apply a single label on a wide variety of round containers. This system is ideal for applications requiring up to 150 products per minute. EconoLine features PLC control and color touchscreen operator interface.

This provides ease of operation, electronic synchronization of the labeling process and storage of up to 20 label/product presets. The “no tool” product changeover and modular design make the EconoLine ideal for packaging lines requiring frequent changeovers.

Features and Specs

- Electronic platform: M2 or M3 microprocessor with encoder-based speed compensation
- 4-1/2" width X 120" length conveyor
- Variable speed wrap station for round containers. Available in 12", 18", or 24" lengths.
- “No-tool” product changeover
- Stainless steel welded frame
- Production rate: Up to 150 ppm (dependent upon label/product dimensions)
- Applied accuracy: Up to +/-1/32" (1mm) @ sigma 2
- Maximum product height: 14" (356mm)

- SKU: EconoLine_Wrap
- Speed: Up to 150 products per minute
- Accuracy: 1/32"
- Max Product Height: 14"
- System Length: 10"
