

Beer Bottle, Wine, and Distilled Spirits High Speed Rotary Labeling System

High Performance Rotary Labeling System

This rotary labeling system is designed for beer, wine or distilled spirits glass containers at speeds up to 200 bottles per minute. Featuring Allen-Bradley PLC control, AB PanelView color touchscreen and programmable bottle platforms.

Regional Craft Brewers are one of the fastest growing markets for packaging machinery today.

Quadrel recently completed a six station rotary labeling system for glass beer bottles, capable of speeds up to 300 bottles per minute. This compact, competitively priced rotary labeling system features servo driven bottle platforms with operator selectable motion profiles.

Additional features include Allen-Bradley® PLC, PanelView® color touchscreen, servo driven label feed and internationally compliant guarding. This labeling system combines world class product handling with technically advanced controls creating a product decoration system unsurpassed in accuracy, reliability and performance.

Features and Specs

- Stainless steel welded frame
- Production rate: Up to 160 ppm (dependent upon label/product dimensions)
- Applied accuracy: Up to +/-1/32" (1mm) @ sigma 2

- SKU: Craft_Brew_High_Speed_Labeling
- Speed: Up to 160 bottles per minute
- Accuracy: +/- 1/32"
