

Dairy/ Milk Container Labeling System

The ML60, designed specifically for use in dairies or bottled water facilities, precisely and reliably applies side panel labels to a wide variety of rectangular containers such as quart, half-gallon and gallon dairy containers. Speeds up to 300 products per minute.

Specifically developed for industries such as dairies and water bottling plants in harsh environments. This dairy labeling system precisely and reliably applies side-panel labels to various sizes of rectangular products at speeds up to 300 products per minute. This labeling system comes standard with a servo driven label applicator and color touchscreen HMI. The H-base stand has vertical and horizontal lead screw adjustments and a stainless steel support for easy positioning above an existing conveyor.

Features and Specs

- Integrated frame
- Casters and Leveling Pads
- Variable Speed controls with encoder compensation
- Touchscreen Operator Controls
- Password protected setup screens
